## FOREWORD

Upon the lifting of the enforced curtailment of major capital improvements, and even adequate maintenance, at the end of World War II, the State was confronted with a sizeable backlog of needed projects to bring its physical plant up to a point of adequacy. The required modernization and replacement of facilities, and the provision of new ones to meet increased demands, compelled the State to undertake a heavy construction program.

The report that follows spans the thirteen-year period, 1947-1959, and indicates the extent of the program to overcome the critical deficiencies. It discloses that during this period the expenditure of more than \$190,500,000 has been authorized by the General Assembly for capital improvements, exclusive of highways. In addition to summarizing the authorized expenditures by major functions, as well as presenting a tabulation of legislative fund authorizations, the report sets forth, by agency and institution, a detailed compilation of all projects that have been authorized during the thirteen-year period. The chart on the following page shows the authorized expenditures for capital improvements by basic function.

It is hoped that this report will serve as a useful reference and be helpful to State officials, legislators and others in the consideration of future capital improvement programs of the State.

**CAPITAL IMPROVEMENTS  
AUTHORIZED BY THE GENERAL ASSEMBLY  
BY MAJOR FUNCTION\*  
THIRTEEN YEAR PERIOD, 1947-1959**

**GRAND TOTAL \$190,644,867**

\* Exclusive of highways
